

# MEET KAVAD

+91-8780168799 | Surat, Gujarat - 395010  
meetkavad10@gmail.com Github LinkedIn Portfolio

## EDUCATION

**Indian Institute of Information Technology (IIIT) Surat**  
*Bachelor of Technology in Computer Science and Engineering (CSE)*

**Nov 2022 - Aug 2026**  
**CGPA: 9.54**

## SKILLS

**Languages** Python, Javascript, C, C++, SQL, TypeScript  
**Web Technologies** HTML, CSS, React.js, Express.js, Node.js, Next.js, WebSockets, Postman  
**Databases** MySQL, MongoDB, Firebase  
**DevOps** Git, Linux, AWS EC2, AWS Lambda, Docker

## EXPERIENCE

**Chrome Extension & Node.js Developer**  
*Across The Globe*

**Oct 2024 - May 2025**  
Remote

- Built a **Website Analyzer Chrome extension** to auto-navigate header/footer links, extract structured data, and capture screenshots, increasing scraping efficiency by **70%**.
- Automated **Instagram post scraping** via Chrome extension to fetch media, captions, and metadata, reducing manual data collection effort by **80%**.
- Engineered **RESTful APIs** and refactored **MongoDB models** for **SahajMoney** to meet evolving client requirements.
- Integrated **AdminJS** for **SahajMoney** with custom **React components** and **MongoDB**, enabling clients to manage content intuitively through a tailored CMS interface.
- Refined **Zoho integration logic** in SahajMoney project to fetch consolidated slot availability and reduced **API calls by 50%**, implemented **AWS Lambda alerts** for failure monitoring.
- Led backend development of **PLNR Phase M1**: defined models, created controller logic for **10+ APIs**, and deployed to **AWS EC2** with **PM2 & NGINX**, achieving **99.9% uptime**.

**Junior Developer**  
*Google Developer Groups IIIT Surat*

**Jun 2023 - Aug 2024**  
Surat

- Created **Q&A APIs** in **Node.js** and a real-time leaderboard using **Socket.io** for **Corporate Crime** website.
- Delivered the full system in a **48-hour sprint** for **Spring Fest'24**, supporting **30+ teams**.

## PROJECTS

**Spot It** | *MongoDB, Express.js, React.js, Node.js, Socket.io, Cloudinary*

[Github](#) | [Project Link](#)

- Engineered a **lost and found** web application from scratch with **JWT-based authentication** and email verification, providing users a platform to recover lost items.
- Designed **REST APIs** and real-time chat (CRUD) endpoints, achieving average response times under **200ms**.
- Managed **Multer-based uploads** and **Cloudinary storage**, reducing average load time by **40%**.

**Analysx** | *Python, Pandas, Streamlit, Matplotlib, RegEx*

[Github](#) | [Project Link](#)

- Developed a **WhatsApp chat analyzer** to extract communication patterns, keyword usage, and activity trends from **20+ exported chats**.
- Visualized insights using **5+ interactive charts**, including word clouds, timelines, and heatmaps, helping users explore chat behavior efficiently.

## LEADERSHIP

- Senior Developer, TNP Website** - Led **technical strategy**, supported junior developers, and streamlined role based access control using **Next.js & Firebase** in the admin panel.

## ACHIEVEMENTS

- Achieved **2150+ Rating** on [Leetcode](#) with 700+ DSA and Database Problems solved.
- Achieved 3 Star Rating on [Geeks-for-Geeks](#) with a **1200+ coding score** and 350+ DSA Problems solved.
- Ranked in **Top 10** out of 50 teams in GDSC IIIT Surat's DevHeat Beta hackathon for building [HackedIn](#).
